

# What is Parchment?

**Parchment.com makes it easy to search colleges, see your chances of getting in, and request, store and send transcripts when you are ready to apply.**

1

**Easily send transcripts from the comfort of your own home.**

- 1) Go to [www.parchment.com/join](http://www.parchment.com/join)
- 2) Sign up to create your account with Parchment
- 3) Add your school to your Parchment account
  - Click the Get Started button
  - Add your high school
  - Complete waiver information
  - Complete the Transcript Authorization Form by either entering the Parchment Registration Code or electronically signing the form
  - Receive confirmation that your school has been added and begin placing transcript requests by selecting the 'Deliver' tab
- 4) Request delivery of your transcript to any destination worldwide
  - Select the destinations, such as Academic Destinations, the NCAA, The Common Application, yourself or any other destination
  - Review destinations
  - Provide debit/credit card payment if there are fees associated with the request
  - Receive a confirmation with the Tracking ID and next steps for your transcript request

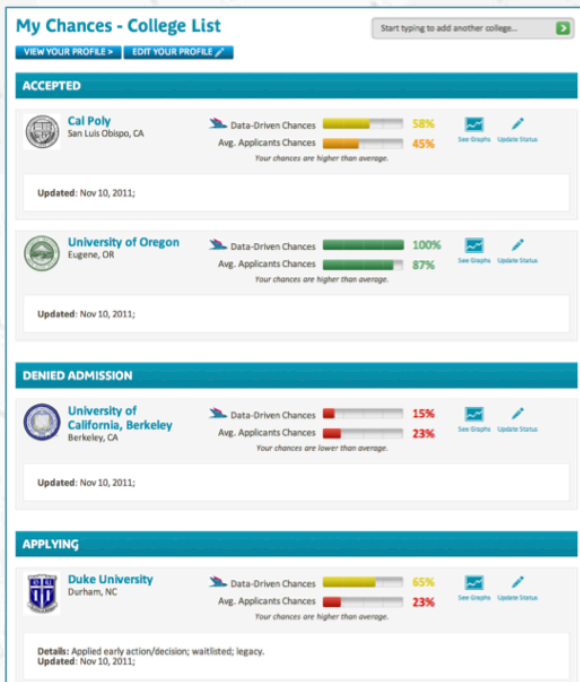

Search for your school

High School	City, State	Country
Screening Eagle High School	Eagle Rock, IN	US

Colleges & Universities

Institution Name	City, State	Country	Organization Type
Docufile Institute of Technology	Camarillo, CA	US	Private University/4 Year College

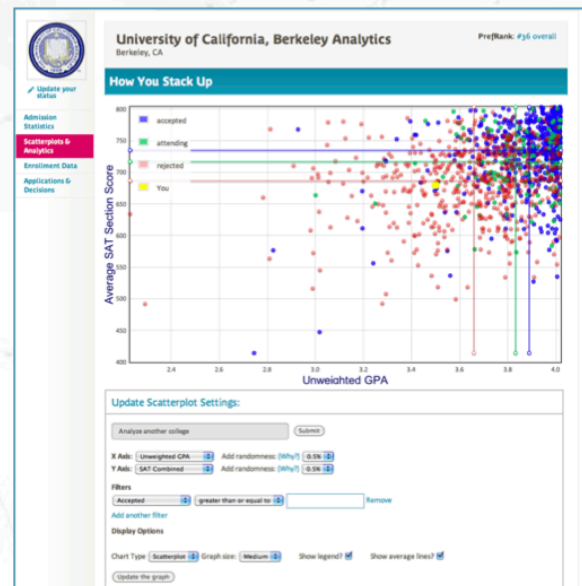

## 2 Get organized for applying to college.

- Create your profile to store your college application information in one place, such as: Unweighted GPA, weighted GPA, SAT scores, SAT II scores, ACT scores, AP classes and scores, extracurriculars, awards and more.
- Search for colleges and build your college list
- Keep track of your college application decisions
- Discover new colleges by seeing where students like you apply with the Parchment College Recommendation Engine™
- Ask for help and advice in the Discussion Boards

## 3 See how you stack up.

- Complete your profile and add colleges to your list to get your data-driven Parchment predictions.
- How are these predictions created? Parchment builds statistical models from the results of students who have voluntarily added their admissions data in the past.
- On each college's page, click the "Scatterplots & Analytics" link to see a how you stack up against admitted and denied students at that college. Tip: Mouse over the dots to see actual student profiles.
- See each school's prediction accuracy by visiting the **Chance Details** page. In general, colleges with more data have better models.
- Predictions are probabilities. If you are given a 10% chance and you applied to a college 100 times, you should be accepted 10 of those times, if the college's model were accurate.

If you want to attend a college, you should **ALWAYS** apply. Students get in to colleges despite 0% chances. The predictions are only meant to be a guide to help you build your list.

The only way to guarantee you will not get into a college is to not apply.
