

Tuberculin Examinations

Substitute Teachers must provide proof that they are free of active tuberculosis every **four** years. This must be from a medical provider showing your name, date, the doctor's name, signature, telephone number, and the results of the test. You will be notified by HR of your TB test expiring but it is your responsibility to update your TB test as needed. You must request the Mantoux test or the TB Risk Assessment test. Failure to provide proof of freedom from TB will result ineligibility for service. In order to access and accept jobs in the system, your TB test **must** be up-to-date. This is a requirement of the California Education Code Section 49406. **Substitutes will be terminated immediately if updated TB tests are not received.** Below is a list of locations where you can get the TB test done and the form you can take with you.
