Prescription Savings

(UHC and UMR members)

Hypertension, diabetes and high cholesterol are some of our members' most common health challenges. Copays are waived for generic hypertension, preferred generic oral hypoglycemic and preferred generic cholesterol medications when filled at a Smart90 retail or mail-order pharmacy.

Express Scripts now offers Price Assure – a partnership with GoodRx – to unlock savings for UHC members on select generic medications when filled at an in-network pharmacy. Price Assure works with Express Scripts behind the scenes to find you the best possible savings. If savings are available, you automatically receive the discounted rate.

Express Scripts members also have access to the SaveonSP program, which waives copays for certain specialty medications and ensures that, once enrolled, you have no financial responsibility. These medications will continue to be filled through Accredo.
