

BOAT TRIP REGULATIONS

1.0 PURPOSE

To ensure the safety of students, all boats or vessels upon which students are transported must meet the following requirements:

- 1.1 Be classified as a “common carrier” and maintain a liability insurance policy of at least \$5 million.
- 1.2 Be annually certified by the United States Coast Guard as a safe passenger vessel.
- 1.3 Have on board at time of departure safety and life saving equipment designed for the number and ages of the students.

It is the responsibility of the building principals to ensure that the students are well supervised and that prudent precaution is taken at all times to ensure the safety of both students and staff while on the vessel.
